2021-04-23 (week 5)
Hanna Schaff

1 What do I want to learn or understand better?

So far I've made a lot of progress in becoming more comfortable with programming and setup-related things. Exactly where I want to be at the end of this project I don't quite know, but I think I would like to be confident in my ability to program a Discord bot. And to continue learning I will make sure to look at and learn from the others' implementations and to be active in possible future discussions on code quality.

2 How can I help someone else, or the entire team, to learn something new?

Markus had the good idea to switch programming partners each week, so that we all get to work with each other and learn from each other. I think that's a good idea which will enable us all to be of help to each other. I will make sure to be attentive to my future programming partners, and offer help when possible.

3 What is my contribution towards the team's use of Scrum?

Like the previous weeks we all make sure to update the scrum board, to attend the necessary planning and evaluation meetings.

4   What is my contribution towards the team's deliveries?

This week me and my programming partner delivered the user story we chose, all according to plan. We did have some time left after finishing the story, so now we know that we can take on a little more next sprint.
