2021-04-03 Individual Reflection (week 2) Hanna Schaff

What do I want to learn or understand better?
Currently I know how to write user stories, but not how to properly estimate workloads and divide a project into appropriate user stories. I understand that this is not something you learn immediately, but this is a good opportunity to practice. To practice I will make sure to be present and participating when we, as a group, decide on user stories.

How can I help someone else, or the entire team, to learn something new?
Planning the project and creating user stories will be a team effort, as well as learning the details of discord bot programming. So I will try to stay as up-to-date as my teammates.

What is my contribution towards the team's use of Scrum and the team's deliveries?
This week we have only had meetings regarding project scope. We're currently waiting for a specification from our client (which we will have on monday). After that scrum process and deliveries will be relevant to our work method.
